

## Hazardous Waste Facility Sittard-Geleen- The Netherlands

**Customer:** Municipality of Sittard-Geleen

**Site Location:** Geleen

**Installation:** 2014

**Foot print:** (L x B) 10,4 x 8 meter

**Usable space:** 80 m<sup>2</sup>

**Number of Modulo blocks:** 4

**Project Details:** The Municipality of Sittard-Geleen was seeking a total concept solution to deal with its HHW. Before it decided to build a permanent HHW facility, HHW was collected through event days and through use of HHW collection vehicles. Sittard-Geleen decided to build a Modular HHW facility. Modulo established 3 fire resistant compartments with one central receiving/working area.

The site is in compliance with all European and Dutch Regulations (Guidelines for Environmental Protection Measures and Chemical Waste Storage, National and International Fire Codes). It has all fire safety features, including 3 hours fire rated walls, fire rated self closing doors, spill containment with self-contained sumps, chemical resistant removable gratings, certified electrical, electrical centre connections, outlets, emergency eye/face wash station, lockable doors, emergency lights, exterior lightning, insulation, heating and temperature control, ventilation, shelves, access into each

compartment, warranty.
