

## Modulo Béton – Innovation Solution for the Construction of HWRCs

Modulo Béton Household Waste Recycling Centres Limited were delighted to be shortlisted as a finalist in the “Innovation in the Design of a Waste Management Facility” section of Letsrecycle’s Awards for Excellence recently.

At a sumptuous award ceremony held at the Landmark Hotel in Marylebone, (London), Modulo Béton’s UK Director of Business & Facility Development, Ian Dudding, received the certificate presented by BBC Breakfast’s host Susanna Reid.

Modulo Béton UK’s CEO, Henk Verkouille, said, “Household Waste Recycling Centres are often overlooked as focus typically centres on developing major waste infrastructure. However, Modulo Béton has demonstrated that HWRCs can also be (re)constructed in an innovative and cost effective way, endorsing the role of these increasingly vital, public-facing facilities”.

To find out how a Modulo Béton solution may address your HWRC needs please contact [info@modulo-beton.com](mailto:info@modulo-beton.com). In addition, Ian Dudding has also recently become Chair of the Chartered Institution of Wastes Management’s London & Southern Counties Centre and can be met at most of the (monthly) Open Meetings held by the Centre, or can otherwise be contacted any time on [ian.dudding@modulo-beton.co.uk](mailto:ian.dudding@modulo-beton.co.uk)

Modulo Béton HWRCs Ltd will also be exhibiting at this year’s “RWM With CIWM” Exhibition, at the Birmingham NEC, from 10-12<sup>th</sup> September 2013. Visit us on stand 17E38.
